70% Wettable Powder

INSECTICIDE

AMENDMENT

To Previously Registered Labeling

ADD THE FOLLOWING:Low Volume Spray for Control of Adult Mosquitoes:

Apply 1 to 4 ounces BAYGON 70% Wettable Powder (0.05 to 0.175 lb. active) per acre in 1/2 to 1 gallon total volume of water suspension by air.

Low Volume Oil Spray for Control of Adult Mosquitoes:

Apply 1 to 4 ounces BAYGON 70% Wettable Powder (0.05 to 0.175 lb. active) per acre in 1/2 to 1 gallon total volume by air. BAYGON 70% Wettable Powder and oil must be premixed before adding to the aircraft tank. The powder should be added slowly to the quantity of oil and mixed well during the addition. When the uniform mixture is obtained and the material is transferred, recirculation in the aircraft should be sufficient to maintain a homogeneous suspension. Precaution should be taken not to inhale dust particles during mixing.
