2-(1-Methylethoxy)phenol

methylcarbamate 70%

EPTED

MAR 22 1984

U.S.
Fungicide
as amended for the pesticide
registered under
EPA Reg. No. 3125-146

AMENDMENT TO PREVIOUSLY REGISTERED LABELING

Revise to Read as Follows:Pest Control In and Around Homes, Apartment Buildings, and Similar Dwellings.Indoors:

To obtain initial control of ants, cockroaches, fleas, millipedes, silverfish, spiders, ticks, waterbugs, and to aid in the control of saw-toothed grain beetle (exposed stage), use a clean out solution containing 1.1% of BAYGON. Continue applications as needed with a maintenance application using a 0.5% solution. Apply to baseboards, window frames, the undersides of shelves and drawers, under sinks and stoves and to other places where insects may hide. Also spray cracks, crevices and surfaces where insects may crawl when they come out of hiding. Repeat as necessary. Do not spray foodstuffs or house plants. DO NOT USE AS A SPACE SPRAY. Do not treat animals. Treat pets with an E.P.A. approved product registered for pet use.

	Solution	Ounces BAYGON 70% W.P./Gallon of Water
Clean-out	1.1%	2 (3/4 cupful)
Maintenance	0.5%	1 (4 heaping tablespoonfuls)

*Refer to Conversion Table

Since BAYGON 70% W.P. is applied as a water suspension spray, use care in treating surfaces that could be stained or water-marked. It has been shown that BAYGON 70% W.P. does not stain or cause color changes in rugs, carpets, draperies, wallpaper and similar materials, direct treatment before testing should be avoided. In case of doubt about materials that could be stained or water-marked, test the spray on a small representative area before treating entire surfaces.

CONVERSION TABLE (Weight to Volume)		
OZ.S BAYGON 70% WP	VOLUME MEASUREMENT	MOBAY SCOOP*
3/4	3 heaping tablespoonfuls	2 small scoopfuls
1	4 heaping tablespoonfuls	1 large and 1 small scoopful
