FUNGICIDE AND ROENTICIDE ACT  
FOR ECONOMIC PEACE, REGISTERED  
UNDER NO. 3125-184 SUBJECT  
TO ATTACHED COMMENTS.

REVISE AS SHOWN:

## RECOMMENDED APPLICATIONS

CROP	INSECT	Ounces DYLOX 80% SP	REMARKS
Lawns and Turf	<u>Cutworms</u>	2-1/2	Mix specified dosage (approximately 1/3 to 1/2 cup) of DYLOX 80% Soluble Powder in 15 to 30 gallons of water and apply uniformly to 1,000 sq. ft. of lawn or turf area by means of a watering can, compressed air sprayer, or any commercial power sprayer. For best results, mow the lawn and rake dead grass from damaged spots. Water the lawn and allow grass to dry before spraying. Do not water again until necessary. Three applications at monthly intervals may be required for maximum control. In most areas, the first of these applications should be made in May or June. Consult your State Agricultural Experiment Station or State Extension Service Specialists, for more specific information regarding timing of applications. Do not use DYLOX 80% Soluble Powder in hose proportioner sprayers.
	<u>Sod webworms</u> (Lawn moths)	to 3-3/4	
	<u>White Grubs</u>	<u>3-3/4</u>
