MAY 17 1967
UNDER THE FEDERAL FOOD, DRUG,
AND COSMETIC ACT, THIS PRODUCT
FOR WHICH THIS LABEL IS APPLIED
IS SUBJECT TO THE FOLLOWING
TO ATTACHED CONDITIONS

SIDE PANEL

MAFU Spray provides rapid kill of flies, mosquitoes, wasps, hornets, gnats, flying moths and other small flying insects on contact. Crawling insects, such as cockroaches, bedbugs, ants, fleas, ticks, silverfish, spiders, centipedes, and millipedes are rapidly killed by the fine MAFU spray fog.

For use in homes, restaurants, theaters, food processing plants, warehouses, and similar buildings.

DIRECTIONS FOR USE

Close windows and doors of room to be treated. Remove safety cap. A slight pressure with the index finger on the valve button causes the fine spray fog to be emitted. Do not spray objects but fog the room freely.

Flying Insects: For control of flies, mosquitoes, moths, gnats and similar flying insect pests in an average size room (1500 cubic feet or approximately 12 feet X 12 feet X 12 feet), spray for 15 to 20 seconds. Spray upwards into four corners of room. Keep windows closed for about 15 minutes after treatment.

Spray nests directly at night to control wasps and hornets. A thorough misting around patio, barbeque, picnic table and other outdoor spaces when air is quiet will repel and kill annoying flying insects. Repeat as necessary.

Crawling Insects: For control of roaches, ants, fleas, ticks, silverfish and similar crawling pests, spray cracks of woodwork, walls, floors, around doors and window frames, baseboards, behind shelving of storage areas and other places where these insects may congregate, walk, or hide. Spray ant trails around doors and window sills.

Spray animal sleeping quarters freely for control of fleas and ticks. Force spray into cracks in floor and about room. Spray animal bedding. Repeat as necessary. Do not spray on animals.

For bedbug control, spray entire surface of bedstead, slats, and springs. Spray thoroughly into cracks and joints in bedstead and on tufts and seams of mattress. Do not spray general surface of mattress. Spray on and under baseboards, molding, cracks in floor and walls and underneath loose wallpaper. Air mattress until completely dry - for at least 4 hours before reuse.

RESTRICTIONS

Remove pets and cover fish bowls tightly before spraying. Avoid contamination of food or water, food utensils or food preparation areas.

CAUTION

May be harmful if inhalation or skin contact is prolonged. Do not remain in room after fogging.
Wash thoroughly with soap and water after handling.
Keep out of reach of children. Do not store with food.
Discard empty containers but do not puncture or throw container into fire.
