Dear Mr. Thornton:

Subject: Use Deletion
Baytex Technical Insecticide
EPA Registration Number 3125-197
Your Submission Dated October 13, 1988 and June 19, 1989

FR Publication: FRL 3950-4; OPP-30326; Vol 56, No. 215
November 6, 1991

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

1. Update the Note to Physician as follows:

Note to Physician: Fenthion is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

2. Since issuance of the Registration Standard for fenthion in 1988, Mobay has requested to delete all uses except for adult mosquito control in Florida. Thus, under Directions for Use, limit the manufacturing use of this product to the particular pest and site, i.e.,

Baytex Technical is intended for formulation into end use products for adult mosquito control in Florida only.

3. Revise the Storage and Disposal statements as follows:

a. The statement "Do not contaminate water, food or feed by storage or disposal." should appear immediately following the main heading ~~Storage and Disposal, not after Pesticide Disposal.~~

CONCURRENCES

SYMBOL								
SURNAME	TML							
DATE	4/2/92							

b. Next, add the subheading "Storage" followed by the paragraph beginning "Store in a cool, dry place..."

c. The Storage statement should be followed by the Pesticide Disposal statement (i.e., "Wastes resulting..."), followed by the Container Disposal statement.

4. Place the chemical name in brackets and capitalize the common name for fenthion as follows:

ACTIVE INGREDIENT:

Fenthion [O,O-Dimethyl O-[3-methyl...

Submit five copies of your final printed labeling before you release the product for shipment. A stamped copy of the labeling is enclosed for your records.

Sincerely,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

Insecticide

ACCEPTED
with COMMENTS
in EPA Letter Dated

APR 2 1992

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

3125-197

FOR USE ONLY IN THE MANUFACTURE OF INSECTICIDES

ACTIVE INGREDIENT:

fenthion 0,0-Dimethyl 0-[3-methyl-4-
(methylthio)phenyl] phosphorothioate 93%

INERT INGREDIENTS: 7%
100%

DO NOT STORE BELOW 45°F.
KEEP IN A COOL, DRY PLACE

EPA Reg. No. 3125-197

EPA Est. No. 3125-MO-1

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

May be fatal if swallowed, inhaled, or absorbed through the skin. Rapidly absorbed
through the skin. Do not get in eyes, on skin, or on clothing. Do not breathe spray
mist. Avoid contamination of feed or food. Keep out of reach of children.

STATEMENTS OF PRACTICAL TREATMENT

If swallowed, vomiting should be induced. Administer water freely and induce vomiting by giving one dose (1/2 oz. or 15 mL.) of syrup of ipecac. If vomiting does not occur within 10 to 20 minutes, administer second dose. If syrup of ipecac is not available, induce vomiting by sticking finger down throat. Repeat until vomit fluid is clear. Never give anything by mouth to an unconscious person. Professional medical assistance should be secured immediately. Wash thoroughly with soap and warm water after handling. Wash clothing with soap and hot water before reuse.

TO PHYSICIAN

ANTIDOTE - Administer atropine sulfate in large therapeutic doses. Repeat as necessary to the point of tolerance. 2-PAM is also antidotal and may be administered in conjunction with atropine.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the Environmental Protection Agency.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BAYTEX Technical is intended for formulation into end use products for:

TERRESTRIAL NONFOOD CROP

Noncrop, Wide Area, and General Outdoor Treatments

AQUATIC NONFOOD

Aquatic Sites (including tidal marshes, swamps) (non-potable water supplies)

STORAGE AND DISPOSAL

Pesticide Disposal: Do not contaminate water, food or feed by storage or disposal.

Pesticide wastes are toxic. Improper disposal of excess pesticide, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Do not use container in connection with food, feed, or drinking water. Completely empty container into the processing equipment. Then dispose of empty container in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

STORAGE AND DISPOSAL (Continued)

Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area.

Handle and open container in a manner as to prevent spillage. If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. Do not walk through spilled material. Dispose of pesticide as directed above. In spill or leak incidents, keep unauthorized people away. You may contact the Mobay Emergency Response Team for decontamination procedures or any other assistance that may be necessary. The Mobay Kansas City Emergency Response Telephone No. is 816-242-2582, or contact Chemtrec at 800-424-9300.

BAYTEX is a TM of Bayer AG, Germany.
