

and the fact that the functions of the Government are not the same as those of the private sector.

1961. *Journal of Wildlife Management* 25: 1-11. (Reviewed by J. H. Brown, Jr.)

These 100,000 1/2 inch x 1/4 inch prepared XRAY-CLIP frames will effectively control the X-ray problem in 1960 and 1961.

It is expected, therefore, that there will not exist any fish populations that may be exposed to treated waters. This holds applications will be toxic to freshwater clams and mollusks and may be toxic to fish species unable to maintain a position above the lake bottom.

Do not handle for 14 days after use. Wash thoroughly with soap and water after handling. Do not contaminate food or feed. Keep out of reach of children.
