## RECOMMENDED APPLICATIONS

Pounds  
SENCOR  
70% WP

## REMARKS

2-¼ to 4-¼

**BROADCAST:** Apply specified dosage per acre using 20 to 30 gallons of water with ground equipment or 5 gallons of water with aircraft spray equipment. Apply as a broadcast spray during the Fall after planting or to the stubble after harvest. Make a second application in early Spring prior to green-up. Use the higher rate on heavy clay soil and on soil with a high percentage of organic matter. If necessary a third application may be made in late Spring at layby. Do not apply within 60 days of harvest.

1-1/8 to 2-¼

**BAND:** Apply specified dosage in 10 to 20 gallons of water per acre in a 30 to 36 inch band over the row during the Fall after planting or to the stubble after harvest. Make a second application in early Spring prior to green-up. Use the higher rate on heavy clay soil and on soil with a high percentage of organic matter. If necessary a third application may be made in late Spring at layby. Do not apply within 60 days of harvest.

Do not use treated foliage for feed or forage.

**IMPORTANT:** This supplemental labeling is not intended to provide full information for use of this product. Before using SENCOR 70% Wettable Powder, read and carefully observe caution statements, directions for use, restrictions, and disposal information on the label.
