## SENCOR DF Herbicide

### SENCOR In Combination With Other Herbicides

SENCOR DF may be applied as a tank mix with Finesse<sup>®</sup>, Glean<sup>®</sup>, 2,4-D, MCPA, Igran<sup>®</sup>, Banvel, Bronate, Brominal, ME4 Brominal, 3+3 Brominal, Brominal Plus or Buctril. Refer to the other product labels registered for this use for additional directions, rates and weed species controlled. Observe all cautions and limitations on labeling of all products used in mixtures.

### IRRIGATED WHEAT

Follow timing directions for dryland wheat found at the beginning of this cereals section. After application of SENCOR DF, do not apply more than 1/2 inch of water for the first irrigation; the maximum amount for each additional irrigation should not exceed 1 inch.

### SENCOR plus Igran Tank-Mix Application

Apply SENCOR DF at 1/3 to 1/2 pound per acre and Igran 80WP at 1/2 to 3/4 pound per acre according to label directions. The rate of each product depends on soil type. Do not use Igran on sand or loamy sand soils. Use lower rate of Igran on sandy loam soils.

### BROADLEAF WEED CONTROL ONLY:

Where only broadleaf control is needed, SENCOR DF applied at the rates listed below in a tank mix combination with Brominal, Brominal Plus, ME4 Brominal, 3+3 Brominal, Bronate or Buctril can be used to control wild buckwheat, in addition to all the weeds listed on these labels.

### RECOMMENDED BROADCAST APPLICATIONS

SENCOR DF lb./A	REMARKS
1/4 to 1/3	Apply SENCOR in a tank mix combination with Brominal, Brominal Plus, ME4 Brominal, 3+3 Brominal, Buctril or Bronate. Use higher rate of SENCOR for control of larger broadleaf weeds that are 2 inches in diameter or height. Apply before weeds are greater than 3 inches in diameter or height. Not for use on sand soils.

SPECIAL PRECAUTIONS: Refer to the General Mixing and Application, and Precautions in the front of the cereal section.

Temporary chlorosis or injury may occur after application of SENCOR DF to wheat, especially if frost or snow occurs within a few days after application. Heavy rainfall (1 inch or more) within 4 days following application may result in crop injury.
