Dear Mr. Brussell:

Subject: Oftanol 2 Flowable
 EPA Registration No. 3125-342
 Your Amendment of October 25, 1983
 Addition of Fire Aats

The amendment referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable provided that you:

1. Make the label change listed below before you release the product for shipment bearing the amended labeling.

The mound drench treatment must include instructions for application of only one such treatment. Though your letter of October 25, 1983, makes reference to this label revision, your label submitted October 25 lacked such instructions.

2. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

William H. Miller
 Product Manager (16)
 Insecticide-Rodenticide Branch
 Registration Division (TS-767)

JAN 17 1984

®OFTANOL
2 Insecticide

Under the Fungicide, Insecticide, and Plant Nematicide Act
as amended, for the pesticide
registered under EPA Reg. No.

ACTIVE INGREDIENT:

1-Methylethyl 2-[[ethoxy(1-
methylethyl)amino]phosphino-
thioyl]oxy]benzoate 22%

5125-342

AMENDMENT

To Previously Registered Labeling

Add the Following:

RECOMMENDED APPLICATIONS

CROP	PEST	DOSAGE OFTANOL 2 INSECTICIDE	REMARKS
Turf grasses	SOIL INSECTS Fire ants	1 gal/A or 3 fl. oz./ 1000 sq. ft.	<p>Be Sure to Read "APPLICATION EQUIPMENT" Section of this label.</p> <p>Apply specified dosage in sufficient volume of water to provide uniform distribution of OFTANOL 2 Insecticide. Minimum interval between applications must be 30 days.</p> <p>Do not apply more than 2 gallons of OFTANOL 2 Insecticide per acre per year or an equivalent amount of 4 lbs. of active ingredient per acre per year, regardless of formulation used.</p> <p>Area Fire Ant Control: Apply specified dosage uniformly over area to be treated in sufficient water to thoroughly wet foliage. Water immediately after application using 1/2 to 1 inch of water. If established mounds are present use the mound drench treatment prior to area application. If a mound drench treatment is made only one area treatment may be made.</p>
		1 ml. per 3 gallons of water	<p>Established Fire Ant Mounds - Drench Treatments:</p> <p>Wet Conditions: Thoroughly drench mound and surrounding 9 square foot area by gently sprinkling with the 3 gallons of mixture.</p> <p>Dry Conditions: Treat as noted for wet conditions, however, to insure penetration apply an additional 3 gallons of water to the treated mound area after treatment.</p>
		Consult your local turf, state Agricultural Experiment Station, or state Extension Service Specialists for more specific information regarding timing of application.
