First Aid

The table below describes the first aid procedures for incidents involving Grub Eliminator.

IN THE CASE OF ACCIDENTAL...	IMMEDIATELY...
Swallowing	• Call a doctor or poison control center for treatment advice
Contact with eyes	• Hold eye open and rinse eye slowly and gently with water. • Continue to rinse eye for 10 to 15 minutes. • Call a doctor if irritation persists.
<p>NOTE: When calling poison control center, have this product label accessible. If seeking treatment at an emergency room or doctor's office, bring this product label to show medical personnel. You may call 1-800-414-0244 for medical emergency information. Active Ingredient: Imidacloprid (CAS # 138261-41-3)</p>	

Note to Physician: No specific antidote is available. Treat the patient symptomatically. You may call 800-414-0244 for more information.

Environmental Hazards

- This pesticide is highly toxic to aquatic invertebrates. Do not apply directly to water.
- Do not contaminate water when cleaning equipment or disposing of equipment washwater.
- Apply this product only as specified on this label.

DIRECTIONS FOR USE IMPORTANT:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Follow Label Directions

Responsible Use

- To use responsibly, follow these guidelines when applying Grub Eliminator:
- Avoid applying the product to waterlogged grass as this may decrease the product's effectiveness.
 - During application, check your spreader frequently to make sure it is working properly and spreading the product evenly. Avoid using a spreader that supplies the product in narrow, concentrated, or uneven amounts.
 - After you apply the product, avoid mowing the lawn until you have watered the area or rainfall has allowed the product to penetrate the soil. Grub Eliminator works best when rainfall or irrigation occurs within 24 hours after application.
 - **Note:** DO NOT apply Grub Eliminator to vegetable gardens.

How to Apply

- Apply the recommended amount of Grub Eliminator to lawns or landscape plants, using a drop-type or rotary-type spreader to spread the product in an even and uniform manner.
- To achieve the best results, apply the product before grubs and mole crickets hatch. Your local County University Extension Office can tell you the best time to apply in your area. Describe the product you are using when seeking

- For landscape plantings (including trees, shrubs, evergreens, flowers, and ground cover):
- Prior to application, remove any black plastic from the area to be treated to allow water to penetrate

How to Apply

Apply the recommended amount of Grub Eliminator to lawns or landscape plants, using a drop-type or rotary-type spreader to spread the product in an even and uniform manner.

- To achieve the best results, apply the product *before* grubs and mole crickets hatch. Your local County University Extension Office can tell you the best time to apply in your area. Describe the product you are using when seeking advice.

For landscape plantings (including trees, shrubs, evergreens, flowers, and ground cover):

- Prior to application, remove any black plastic from the area to be treated to allow water to penetrate the soil. Permeable weed barriers do not need to be removed.
- Apply Grub Eliminator spreading it on the soil or mulch.
