OTHER INGREDIENTS*	99.8%
	100.0%

* Other ingredients include: Corn cob granules and dipropylene glycol (to adhere the active ingredient on the granules).

Imidacloprid is the chemical name for Merit® insecticide.

EPA Reg. No. 3125-508

EPA Est. No. XXXX-AA-XX

DIRECTIONS FOR USE	
<p>It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For best results, be sure to read and follow all label directions.</p>	
<p>Before You Use Read and follow directions when using</p>	<ul style="list-style-type: none"> Do not apply near fish pools, ponds, streams or lakes. Do not use in vegetable gardens.
HOW TO USE	
TO CONTROL	WHEN TO APPLY
Grubs	Apply once anytime from May through mid-August.
European Crane Fly Larvae	Apply once, when these insects are present in large numbers (late summer to mid-fall)
Mole Crickets	Apply once anytime from mid-May through mid-June. Florida residents: Apply once anytime between early April through early May.
<p>For best results, apply MERIT 0.2 GRANULAR INSECTICIDE before grubs, mole crickets or European crane fly larvae hatch. Contact your County Extension Agent for the ideal dates to apply in your area.</p>	
LAWNS	<p>How Much: See Spreader Settings</p> <ul style="list-style-type: none"> Adjust spreader to the proper setting (see Spreader Settings). (ART) To be sure you cover the entire area uniformly, first treat the border of the lawn then fill in the center. Make parallel passes, walking at a steady pace to ensure even distribution of the granules. (ART) Water thoroughly after applying. (ART)
FLOWER BEDS, GROUND COVERS, TREES & SHRUBS	<p>How Much: 2 Tablespoons per 10 sq ft of planting bed. 1-1/4 cups per 100 sq ft of planting bed.</p> <ul style="list-style-type: none"> Spread granules evenly to the soil over flower beds, ground cover plantings, shrub beds and under trees. Tip: A hand-held spreader makes this easy. (ART) Rake granules into the soil around plants. Water thoroughly after applying.
	Children and pets may re-enter after the treated area has been watered and allowed to dry.
Continued on next page	

DIRECTIONS FOR USE (Continued)	
FOR BEST RESULTS	<ul style="list-style-type: none"> • Apply early, before grubs, mole crickets and European crane fly larvae hatch. • Water thoroughly within 24 hours after applying. • Do not mow until the granules are watered into the soil. • Avoid applying MERIT 0.2 Granular Insecticide to waterlogged areas, as this may decrease the product's effectiveness. • You may spread MERIT 0.2 Granular Insecticide over soil or mulch. If present, remove weed barrier before applying.
SIGNS OF DAMAGE TO LAWNS	
Grubs	White grubs cause extensive damage to lawns by feeding on grass roots. Grass turns yellow, then brown and dies. Grubs chew off roots so that the grass is easily pulled up in pieces with your hands. You can roll it back like a carpet to reveal the grubs. If patches of dead grass appeared in your lawn late last summer, check for grubs.
European Crane Fly Larvae	European crane fly larvae often cause damage by feeding on grass roots and disrupting the soil surface.
Mole Crickets	Mole crickets often cause extensive damage by tunneling through lawns. Some species also feed on roots. Tunneling uproots the grass so it easily dries out. Lawns turn yellow, become thin, weedy and can eventually die.
HOW MERIT 0.2 GRANULAR INSECTICIDE WORKS	After MERIT 0.2 Granular Insecticide granules are watered in, a protective zone is formed in the soil. If applied early, MERIT 0.2 Granular Insecticide kills grubs, mole crickets and European crane fly larvae when they hatch...before they can cause damage.

Spreader Settings		
If your spreader is not listed, please call our Consumer Service Hotline toll-free (877) 229-3725 for help.		
Rate for Grubs and European crane fly larvae:	2.87 lbs per 1,000 sq ft	
Rate for Mole Crickets:	3.8 lbs per 1,000 sq ft
