## HOW TO USE X-IT ALGAE

For best results, start using X-IT Algae with filling of the pool. If excessive growth of algae is present and pool must be kept in service without interruptions, allow initial dose to work over night. Remove withered algae with pool vacuum cleaner . . . then repeat initial dose. Thereafter, renewal doses will keep water free of visible algae—just add directly to pool.

INITIAL DOSE: 16 ozs. of X-IT Algae to each 25,000 gallons of water in pool.

WEEKLY DOSE: 4 ozs. of X-IT Algae to each 25,000 gallons of water in pool.

### HOW TO CALCULATE THE NUMBER OF GALLONS IN YOUR POOL

Measure Length (L) Width (W) and average Depth (D) in feet.  
For Square or Rectangular Pools: Gallons  $L \times W \times D \times 7.5$   
For Circular or Elliptical Pools: Gallons  $L \times W \times D \times 5.9$

### CAUTION

#### Keep Out of Reach of Children

Avoid getting the concentrate in eyes and on skin. Avoid contamination of foods. Harmful if swallowed. In case of contact, flush with plenty of water. If irritation persists, get medical attention.
