WARNING

KEEP OUT OF THE REACH OF CHILDREN

Contains a very strong oxidizing agent. Keep from heat, flame, or moisture. Keep container closed and in a dry place. DO NOT MIX WITH ANYTHING BUT WATER. Keep away from eyes and avoid breathing dust or fumes. Avoid contact with skin; flush with water after contact.

POISON

Concentrated material may be fatal if swallowed.

ANTIDOTE: External – Wash with water.

Internal – Drink raw egg white, milk, or rice gruel. Follow with emetic (tablespoon of mustard in a glass of warm water). CALL PHYSICIAN.

NOTICE:

HARMFUL TO SKIN AND EYES – In case of contact with eyes flush for 15 minutes and SEE PHYSICIAN.

DIRECTIONS

First: adjust the pH between 7.2 – 7.6. Second: stabilize the pool with 1/4# of Chlor-mate Stabilizer to each 5000 gallons of water to nullify the dissipation of chlorine by sunlight on the water. Use 2 oz. Super Chlor per 5000 gallons of water as an initial treatment. REPEAT as required to establish a residual of 1.0 to 3.0 ppm of available chlorine as determined by a good test kit, normally 1 – 2 oz. every other day for each 5000 gallons of water in the pool.
