SEVEN DAYS ON YOUR PET

For Veterinary Use Only

ACCEP
JUN 29 1973
FLEA AND TICK KILLER
DEODORANT BOMB
FVSCO PHARMACEUTICAL CORPORATION
OCEANSIDE, N.Y.

DIRECTIONS FOR USE:

To operate, remove protective cap from top of can. Hold can upright, about 2 to 4 inches from dog's hair. Point opening on side of valve in desired direction for spray. To release spray place finger on top of valve and press down. Move the bomb over the entire animal, using a "Zig-Zag" motion, until the coat is slightly damp. It may be advantageous especially on long-haired animals, to rub the hand against the lay of hair, spraying into the ruffled hair directly behind the hand. 30 to 45 seconds is sufficient to treat a 30 lb. animal. Repeat treatment as necessary, making sure spray wets ticks. Do not use more often than once every 7 days.

Thoroughly spray interior of kennel or other animal sleeping quarters. Also spray bedding and replace with fresh bedding if necessary. WHERE ANIMAL ODOR IS PRESENT, SPRAY LIGHTLY INTO THE AIR.

This bomb makes a slight hissing sound and causes a temporary cool sensation. Nervous animals may become frightened the first time this bomb is used but soon become accustomed to the treatment.

CAUTION:
Keep Out of Reach of Children.
See side panel for other cautions.
