

[9143-23]

**DIRECTIONS:** Remove protective cap. Hold dispenser upright and press button to release fog. For control of flying and crawling insects listed below in closed rooms, offices, warehouses, barns, etc. and for temporary control in outdoor sheltered areas such as patios and porches apply as follows:

**Flying Insects:** Flies, mosquitoes, wasps, flying moths, gnats: Shut doors and windows and spray up into air with a sweeping motion at the rate of three to five seconds per 1000 cubic feet. Keep room closed for at least fifteen minutes after spraying.

For outdoor applications fog for five to ten seconds per 1000 cubic feet. For best results use when air is still.

**Crawling Insects:** Roaches, silverfish, waterbugs, crickets: spray hiding places such as baseboards, openings around sinks, drains and pipes. Also secluded places. Spray directly on these insects whenever possible. Repeat as needed. **Spiders and Centipedes:** Spray webs and other places where these pests crawl. Spray directly on as many of these insects as possible. Repeat as needed. Foods should be removed or covered during treatment. Food processing facility should not be in operation during treatment and all processing surfaces should be covered and then cleaned before reuse.

**CAUTION:** Keep out of reach of children. Avoid breathing spray mist. Do not remain in treated areas and ventilate after treatment.

Cover fish bowls and remove birds when spraying rooms. Do not spray directly on animals, plants, feed or foodstuffs, dishes or kitchen utensils. Do not spray directly on plastic or asphalt, tile or linoleum as ingredients may be harmful to some such surfaces. Store container below 120 degrees F. Do not puncture container or throw in fire.
