ACCEPTED

July 7 - 1970

FLY-KILL can be used around food, food products, and utensils, only according to directions.

CAUTION: Food should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

FLY-KILL kills on contact flies, mosquitoes, gnats, sand flies, silverfish, crickets, house spiders, wasps, hornets and ants. Remove pets, birds, and fish bowls before spraying.

CAUTION: Do not spray near or toward an open flame. Do not use on household or garden plants.

CAUTION: Keep from reach of children.
Harmful if swallowed.

HAND SOAPS

Coconut Oil Powder
Honey Cream
Waterless

DISINFECTANTS

Lemon—0.5 & 10
Pine Coat 5
Mint Coat 5

DEODORANTS

24-oz. Wall Blocks
4-oz. Urinal Cakes

Glass Cleaner Bombs

DIRECTIONS FOR USE

CRAWLING INSECTS: FLY-KILL gives effective results against such crawling insects as ants, crickets, house spiders and silverfish when used in a good sprayer or atomizer adjusted to deliver a fine mist behind baseboards, moldings, furniture, cabinets, shelves, sinks and pipes, toward drains and dark corners and into cracks, crevices and recesses and similar hiding places.

Window sills, door frames and ant trails should be treated. Repeat applications as needed.

FLYING INSECTS: FLY-KILL is especially formulated to control flies, mosquitoes, gnats, wasps, and certain flying insect pests. Direct a fine spray toward upper portions of the room and saturate the atmosphere with the mist. Use 2 to 3 ounces of FLY-KILL to each 1,000 cubic feet of space. Vacate room and when possible, keep the doors and windows closed for 10 minutes after spraying. Turn off all gas and pilot lights.
