DIRECTIONS FOR USE

DAY-O-LITE FLUID is especially effective against flies, mosquitoes, gnats, and wasps. Direct a fine spray toward upper portions of the room and saturate the atmosphere with the mist. Use 2 to 3 ounces of **DAY-O-LITE FLUID** to each 1,000 cubic feet of space. Vacate room and when possible, keep the doors and windows closed for 10 minutes after spraying. Turn off all gas and pilot lights.

CRAWLING INSECTS

DAY-O-LITE FLUID gives most effective results against ants, crickets, house spiders, roaches, and silverfish, when used in a good sprayer or atomizer adjusted to deliver a fine mist behind baseboards, moldings, furniture, cabinets, shelves, sinks and pipes toward drains and dark corners and into cracks, crevices, recesses and similar hiding places. Window frames, door sills, and ant trails, should be treated. Repeat applications as needed.
