DIRECTIONS FOR USE

For general weed control on non-crop areas mix **RADICATE** at a rate of 1 pound with 4 to 7 gallons of water in a sprayer that will give uniform coverage on 1600 square feet. **RADICATE** to water with 4 to 7 gallons of water or spot treating may be used by spot spraying with 1/2 to 1 quart of **RADICATE** per 100 square feet with a backpack sprayer. For control of weeds and grasses, **RADICATE** will treat 100 to 200 feet long. Best results are obtained if tall vegetation is cut down and the litter removed before treatment or when weeds are young to appear. For control of growing grass, **RADICATE** will kill growing grass. For best results, **RADICATE** is best applied to the roots of weeds. For the most effective results, the weeds should be growing freely. For best results, the weeds should be growing freely.
