

Aero-Master

AIR SANITIZING COMPOUND

FOR USE IN THE MODEL "G" AERO-MASTER FOGGING MACHINE

Lessens the danger of airborne infection by reducing the number of airborne bacteria and virus particles when used as directed in the AERO-MASTER Model G Fogging Machine. Effectively deodorizes and refreshes air in confined areas. Contains no perfume.

NON-FLAMMABLE

NON-STAINING

CAUTION

Keep out of reach of children.

See side panel for other cautions.

Do not reuse container. Destroy when empty.

ACTIVE INGREDIENTS:

Triethylene Glycol	95.5%
Propylene Glycol.....	3.5%
Parachlorometaxylenol.....	1.0%

DIRECTIONS

Close all doors and other openings to prevent fog from escaping. Fill AERO-MASTER Fogging Machine with AIR SANITIZING COMPOUND. Set timer to 15 minutes per 20,000 cubic feet of space to be treated.

Hold the fog in the room until it is evenly distributed from wall to wall and floor to ceiling. You will have a refreshing breeze in which airborne bacteria and virus particles are reduced.

CAUTIONS

Do not contaminate surfaces near food or food preparation. Avoid contact with skin and eyes. Harmful if inhaled. Fogged area should be vacant for 2 hours after fogging.

This product is used in the Model "G" Fogging Machine.

DIRECTIONS

Close all doors, windows and other openings to prevent fog from escaping. Fill AERO-MASTER Model "G" Fogging Machine with AERO-MASTER AIR SANITIZING COMPOUND and set timer to fog 1 minute per 20,000 cubic feet of space to be treated.

Hold the fog in the area until it is evenly dispersed from wall to wall and floor to ceiling. You will then have a refreshed atmosphere in which airborne bacteria and virus particles have been reduced.

CAUTION

Do not contaminate or store near food or foodstuffs. Avoid contact with skin and eyes. Harmful if swallowed. Fogged area should be left vacant for 2 hours after fogging.

This product is for use only in the Model "G" AERO-MASTER Fogging Machine.
