Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed. Sweep up and destroy fallen insects. Repeat treatment as necessary.

KILLS WASPS AND HORNETS: Space spray. Before applying, close all doors, windows and ventilator openings in unfinished attics and crawl spaces where direct sprays cannot reach pests, point nozzle upward and fill the area with mist at the rate of 35 seconds per 1,000 cu. ft. of space. Leave treated area immediately after application is complete. Closing off area for at least 1/2 hour. Ventilate area when treatment is complete. Repeat as necessary.

KILLS CRAWLING INSECTS: Roaches, earwigs, grain mites, sowbugs, spiders and centipedes: Spray thoroughly into cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insects where possible as a contact spray. Repeat applications as necessary.

**OUTDOORS-REDUCE ANNOYANCE FROM FLYING
INSECTS AROUND PICNIC AND RECREATIONAL
AREAS, HOMES AND INDUSTRIAL PLANTS.**

Kills mosquitoes, gnats (midges), house flies, horse flies, deer flies and small flying moths (millers) by spraying their resting areas. Follow precautions listed above. Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion at the rate of from 1 to 3 seconds per cubic yard of space while moving away from the treated areas. To reduce annoyance from these flying insects, treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.
