For use on Non-crop Areas, Right-of-Way, Industrial Plants, Lumber Yards, Truck Farms, Storage Areas, and Pathways. Kills most annual and biennial grasses and broad leaf weeds. The active ingredient of this herbicide will last with a minimum of soil erosion and other soil loss.

Rate: Under ordinary conditions of the rate 12 quarts per 1000 square feet. It may be diluted in 10 gallons of water for use on approximately 1000 square feet where the weeds are difficult to control. At the rate of 12 quarts per 1000 square feet, the solution must be applied in a spray.

How To Apply: Use the herbicide in a spray or broadcast application. It is best to apply to the weeds before they begin to grow. Apply to the weeds before they begin to grow, but before they are too large to spray. Weeds should be sprayed in a broadcast application before they begin to grow.

When To Apply: Do not apply this herbicide to growing crops. It is best to apply to the weeds before they begin to grow. Apply to the weeds before they begin to grow, but before they are too large to spray.

Note: Do not apply this herbicide to growing crops. It is best to apply to the weeds before they begin to grow. Apply to the weeds before they begin to grow, but before they are too large to spray. Do not apply this herbicide to growing crops. It is best to apply to the weeds before they begin to grow. Apply to the weeds before they begin to grow, but before they are too large to spray.

## HERB-TOX Weed Kill

U.S.O.A. Reg. No. 3525-36

### ACTIVE INGREDIENTS:

Monuron Trichloroacetate  
(3-(p-chlorophenyl)-1,1-dimethyluracil-6-yl trichloroacetate)  
Aromatic petroleum Derivative

### INERT INGREDIENTS:

U. S. Patents No. 2,782,112 and 2,801,911
