

NET CONTENTS: 55 GALLONS

STANDARD BRAND 435 SOLUBLE OIL

ENVIRONMENTAL HAZARD WARNING

Keep out of any body of water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

DIRECTIONS FOR USE

CITRUS (Florida)—Grapefruit, Lemons, Limes, Oranges, Tangelos and Tangerines:

SUMMER APPLICATION: For the control of scale insects on citrus, use one (1) gallon to each 100 gallons of water.

Best results can be obtained when the oil is added to a partially filled spray tank under proper agitation and all foliage is thoroughly covered.

Precautions in the use of oil include: Do not apply oil spray when trees are wilting or near wilting. Do not apply oil and sulphur within 3 weeks of each other. Oil spray applied after October 1 may increase susceptibility of trees to cold damage and may reduce the fruit crop the following year. Oil sprays applied in the fall may inhibit solids formation in the juice and retard coloring of fruit, and should not be applied within 60 days of anticipated harvest.

Consult the Florida Citrus Spray and Dust Schedule, or your State Agricultural Experiment Station or State Extension Service Specialist for complete details on the spraying program best suited to your local conditions.

ACTIVE INGREDIENT:

Petroleum Oil

INERT INGREDIENTS:

	By Weight
Petroleum Oil	97.0%
Inert Ingredients	3.0%
	100.0%

This product meets the specifications for oil FC 435-66 as designated in the Florida Citrus Spray and Dust Schedule.
