professional formula  
flying insect  
killer

CONTAINS EXTRA-STRENGTH PYRETHRINS FOR FASTER KNOCKDOWN, FASTER KILL.

DIRECTIONS FOR USE - SHAKE BEFORE USING

INDOOR USE:

**Flying Insects**-To kill flies, mosquitoes, small flying moths and gnats: d-CON's exclusive "ProPower" nozzle blasts more Professional Formula Flying Insect Killer to clear an average size room (10x12 with 8 foot ceiling) of annoying insects in minutes. Do not remain in treated areas. Ventilate the area after treatment is completed. Keep about 3 feet from walls, fabrics, and furniture, and spray with a sweeping motion until room is filled with mist (3 seconds for an average room). Keep doors and windows closed for about 12-15 minutes. Ventilate room before reentry.

**Crawling Insects**-To kill roaches, silverfish, earwigs, fleas, spiders, waterbugs, crickets: Spray hiding places, such as baseboards, and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets and other storage areas. For fleas-remove and destroy animal bedding. Spray sleeping area. Direct spray into cracks in floor. Do not spray animal directly.

**Ants**-Spray trails, hills, around window frames and openings around pipes and baseboards where ants crawl.

OUTDOOR USE:

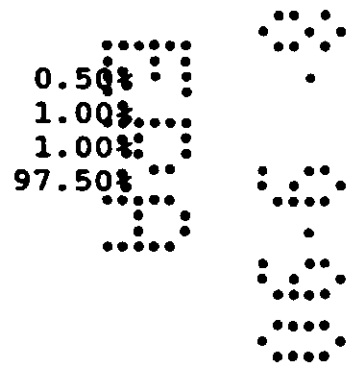

Point valve away from face and direct "ProPower" nozzle downward. Spray with a sweeping motion 5-10 seconds.

**WARNING:** Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F, may cause bursting. Never throw container into fire or incinerator. May stain finished surfaces if sprayed too closely.

Remove pets, birds and cover fish aquariums before spraying.

ACTIVE INGREDIENTS:

Pyrethrins  
Piperonyl Butoxide, technical\*  
N-Octyl bicycloheptene dicarboximide
