RE: Minor Addition to the Label  
EPA Registration Number: 3282-74  
Date of Submission: January 16, 2007

Dear Ms. Jenkins:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated January 16, 2007, for the product d-CON® Bait Pellets II. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the actions requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249 or Joyce Edwards of my staff at 703-308-5479.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda Arrington".

**RE: d-CON Bait Pellets II  
EPA Registration No.: 3282-74  
Certification Statement per PR Notice 98-10**

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Ready-to-use

(1) (4) (5) (6) place packs

-----  
1.0 oz - Bait Pack (for Mice)

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions.

**IMPORTANT:** Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

**USE RESTRICTIONS:** This product may be used to control House Mice in and around homes, industrial, commercial, agricultural and public buildings. d-CON Bait Pellets II may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. Do not use in sewers. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

**SELECTION OF TREATMENT AREAS:** Determine areas where mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").

6/24

-----  
1.0 oz - Bait Pack (for Mice)

**APPLICATION DIRECTIONS:**

**To Control House Mice:** Use one bait pack per placement. Space placements at intervals of 8 to 12 feet in infested areas. Up to 2 bait packs may be used at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by mice. If bait packs are not opened by mice for 5 consecutive days, they may be relocated to other places where mice activity exists and where bait placements consistent with the requirements of this label can be made.

Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

7/24

1.0 oz - Bait Pack (for Mice)

**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Keep away from humans, domestic animals, and pets. Wash hands after handling bait.

<b>FIRST AID</b>	
<b>Have label with you when obtaining treatment advice.</b>	
<b>If swallowed by human</b>	<ul style="list-style-type: none"><li>• Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.</li><li>• Do not induce vomiting unless told to do so by the poison control center or doctor.</li></ul>
<b>If swallowed by pet or animal</b>	<ul style="list-style-type: none"><li>• Call a veterinarian immediately for treatment advice.</li></ul>
<b>NOTE TO PHYSICIAN AND VETERINARIAN</b>	
<p>This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K<sub>1</sub> are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). <b>FOR HUMAN CASES:</b> Vitamin K<sub>1</sub> is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. <b>FOR ANIMAL CASES:</b> Vitamin K<sub>1</sub> is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K<sub>1</sub> should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.</p>	

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

8/24

-----  
1.0 oz - Bait Pack (for Mice)

**STORAGE AND DISPOSAL**

**STORAGE:** Store only in original container, in a dry place inaccessible to children and pets.

**DISPOSAL: If empty:** Do not reuse empty container. Place in trash or offer for recycling if available.

**If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**NOTICE TO BUYER AND USER:** Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

**To Control Norway and Roof Rats:** Use 4-16 bait packs per placement. Space placements at intervals of 15-30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days.

**To Control House Mice:** Use one bait pack per placement. Space placements at intervals of 8 to 12 feet in infested areas. Up to 2 bait packs may be used at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

**For Rats and Mice:** Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not opened by rodents for 5 consecutive days, they may be relocated to other places where rodent activity exists and where bait placements consistent with the requirements of this label can be made.

Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Keep away from humans, domestic animals, and pets. Wash hands after handling bait.

**FIRST AID**

Have label with you when obtaining treatment advice.

<b>If swallowed by human</b>	<ul style="list-style-type: none"><li>• Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.</li><li>• Do not induce vomiting unless told to do so by the poison control center or doctor.</li></ul>
<b>If swallowed by pet or animal</b>	<ul style="list-style-type: none"><li>• Call a veterinarian immediately for treatment advice.</li></ul>

**NOTE TO PHYSICIAN AND VETERINARIAN**

This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K<sub>1</sub> are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). **FOR HUMAN CASES:** Vitamin K<sub>1</sub> is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. **FOR ANIMAL CASES:** Vitamin K<sub>1</sub> is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K<sub>1</sub> should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

**STORAGE AND DISPOSAL**

**STORAGE:** Store only in original container, in a dry place inaccessible to children and pets.

**DISPOSAL: If empty:** Do not reuse empty container. Place in trash or offer for recycling if available.

**If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
