12 OZ BOX-BACK LABEL

KILLS MICE AND RATS

Kills Warfarin-Resistant House Mice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may only be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

12 OZ BOX-BACK LABEL

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "**IMPORTANT:**").

APPLICATION DIRECTIONS:

The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.

To Control Norway and Roof Rats: Use 1 - 4 opened trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed from for 5 consecutive days, relocate them to other places where rat activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.

FIRST AID	
Have this label with you when obtaining treatment advice. HOT LINE NUMBER: 1-800-228-4722	
IF SWALLOWED	<ul style="list-style-type: none"> • Call a Poison Control Center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor. • Do not give anything by mouth to an unconscious person.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.	

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty, do not reuse this container. Place in trash or offer for recycling if available. If partly filled, Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.
