

DIRECTIONS: Mix 1 part STAFFEL'S RATS-N-MICE with 19 parts, by weight, of a suitable bait material. Fresh corn meal, rolled oats or laying mash are ideal. If material is dusty add up to 5% of a bland edible oil. Mineral or corn oil are ideal. This 4 ounce container will make 5 lbs. of bait. Replace baits as they are consumed. Never let a bait station be empty.

DIRECTIONS FOR RAT CONTROL

Place baits in locations where rats and mice feed, water, or travel. Bait placements along walls, in corners, and in concealed locations where rats and mice can feed unobserved are desirable. Contaminated or spoiled baits should be replaced promptly. Baiting should continue until all signs of feeding have stopped. Four ounces of bait per station should be the minimum amount used. Bait should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes. An uninterrupted supply of bait should be maintained for at least 10 days.

MICE can be controlled by using STAFFEL'S RATS-N-MICE in smaller baits, mixing in equal parts (one tablespoonful to one tablespoonful) and distributing more of them.

Place (¼ to ½ ounce) of bait at 8-12 foot intervals.

An uninterrupted supply of bait should be maintained for at least 15 days. Baits should be placed in areas inaccessible to children, pets and domestic animals or in tamper proof bait boxes.

CAUTION — The active ingredients in STAFFEL'S RATS-N-MICE is an anticoagulant chemical which may cause serious hemorrhage in humans, pets or livestock. Call physician IMMEDIATELY if eaten.

CAUTION — KEEP OUT OF REACH OF CHILDREN. See side panel for additional caution.

Note for physicians: Blood transfusions combined with intravenous injections and oral doses of Vitamin K are indicated in case of accidental ingestion of STAFFEL'S RATS-N-MICE causing hemorrhage by overdoses of Dicumarol.
