Non-Poisonous • Non-Flammable • When Used Around Food, Remove it from the premises. Do not breathe the mist.

For flying insects, spray in the room, starting from the center and spray toward the corners. For average room (1000 cubic feet) spray approximately 6 seconds. It is not essential to hit flying insects. Only Zoro's airborne mist will kill insects as they fly through it. Keep windows and doors closed for 15 minutes. To kill hornets, wasps, spray approximately 12 seconds in average room.

Spray baseboards and other surfaces where these bugs crawl, biting as many as possible. Spray under sinks, behind appliances, under cabinets, down cracks and crevices, openings around plumbing and other places where these pests hide and breed. Spray ant trails and bait, biting as many ants as possible. Repeat as needed.

Technical

**CAUTIONS**  
 Do not puncture container or throw into fire. Hold Container 3 feet from interior walls, fabrics, furniture. Cover fish bowls during treatment. Do not store in temperatures above 120°. Certain plastic materials and tiles, painted and varnished surfaces, wallpaper, may have a tendency to discolor, streak and soften when wet with insecticides. Do not spray such materials.

Food, Remove or Cover Exposed Food Before Spraying.

Remove protective cap, hold container upright, aim away from you, push button and spray with circular motion up towards center of room. For average room (1000 cubic feet) spray approximately 6 seconds. It is not essential to hit flying insects — as Zurd's airborne mist will kill insects as they fly through it. Keep windows and doors closed for 15 minutes. To kill hornets, wasps, spray approximately 12 seconds in average room.

Spray baseboards and other surfaces where these bugs crawl hitting as many as possible. Spray under sinks, behind appliances, under cabinets, down cracks and crevices, openings around plumbing and other places where these pests hide and breed. Spray ant trails and hills hitting as many ants as possible. Repeat as needed.
