3314-34

**WEATHER RESISTANT PELLETS  
KILLS RATS AND MICE**

Active Ingredient:

2-[(p-chlorophenyl) phenylacetyl] -

**CAUTION:** Keep away from humans, domestic animals and pets. If swallowed or absorbed by humans, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In that case, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin. Call a physician immediately.

Baits must be placed in areas inaccessible to children, pets, wildlife and domestic animals or in tamper proof bait boxes. Do not allow treated bait to be exposed on bare ground.

Do not reuse container. Destroy when empty.

Keep out of lakes, streams or ponds. Do not contaminate

**CAUTION:** Keep away from humans, domestic animals and pets. If swallowed or absorbed by humans, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In that case, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin. Call a physician immediately.

Baits must be placed in areas inaccessible to children, pets, wildlife and domestic animals or in tamper proof bait boxes. Do not allow treated bait to be exposed on bare ground.

Do not reuse container. Destroy when empty.

Keep out of lakes, streams or ponds. Do not contaminate

**GENERAL DIRECTIONS:** Can be used in wet and damp areas as specified below:

**INDOORS:** Place bait in runways, at feeding and watering areas, behind boards, along walls, between walls, and behind gnawed openings.

**OUTDOORS:** place bait in burrows, in sewers above high water line, and agricultural premises.

**FOR NORWAY AND ROOF RATS:** Place 4 to 16 ounces of bait per placement. Maintain constant supply of bait at stations for at least 10 days as long as there is evidence of rat population.

**FOR HOUSE MICE:** Place ¼-½ oz. (tablespoon amounts) per placement with stations located at 8 to 12 ft. intervals. Maintain constant supply of bait for at least 15 days.

Contaminated or spoiled baits should be replaced promptly.

Treated baits must be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes.
