PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION
Harmful if swallowed. If swallowed, do not induce vomiting; call a physician. Do not contaminate food or foodstuffs. Not for use on horses intended for food. Remove pets, birds and cover fish aquariums before spraying.
Environmental Hazards:
This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food and feed by storage or disposal. Open dumping is prohibited. Pesticide spray mixture or residue that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Triple rinse (or equivalent) and allow for recycling, reconditioning or disposal in approved landfill or bury in a safe place. Consult Federal, state or local disposal authorities for approved alternative procedures.

WARRANTY STATEMENT: Buyer assumes all risks of use, storage or handling of this material not in accordance with directions given hereon.

SPACE SPRAY: For rapid control of household flies, mosquitoes, flying moths and gnats. Close doors and windows and shut off ventilating systems. Use a good sprayer adjusted to deliver a fine mist directing spray toward the upper portions of the enclosure and filling the room with mist. Use 1/2 to 1 ounce of spray for each 1000 cubic feet of space. Keep area closed for at least 15 minutes after spraying. Vacuum area after treatment and ventilate before reoccupying. Sweep up and dispose of fallen insects.

AS A CONTACT SPRAY: Indo-thrin G.P. is also very effective when used as a contact spray against mosquitoes, gnats, wasps, hornets, skippers, scorpions and cheese mites. When these insects are present contacting them with a fine mist will provide immediate kill. Spraying walls, ceilings, light moldings, screen doors and door frames, beams and light cords will make these locations unfavorable as resting or hiding places for these insects.
