PHYSICAL OR CHEMICAL HAZARDS

Flammable: Contents under pressure. Keep away from heat, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting

Kills Wasps, Hornets, and Yellow Jackets: This spray is fast acting; when insects are hit directly Allow about 24 hours for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again. This container delivers a stream type spray, making it possible for the operator to stay back from places sprayed.

DIRECTIONS: Remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct spray at insects wherever possible and under eaves, into nests, cracks, holes or crevices wherever insects are noticed

Spray for about 10 seconds or until surface is moist from insecticide To prevent entrance of insects into the house, spray around points where outside plumbing, faucets, enter the house and into any cracks or crevices in foundation as well as along sills and ledges.

This formulation utilizes pyrethrins, piperonyl butoxide and a carbamate type insecticide, a combination particularly effective on this class of insect.
