insect spray

DIRECTIONS

To spray: Hold dispenser upright and point opening of valve away from person. Press valve to release spray. Always hold dispenser three feet from surfaces for efficiency. To avoid reaction with such materials as asphalt and plastic tires, some linoleums, etc. do not spray on or in such manner as to cause mist to fall on these materials.

Flying Insects: Flies, Flying Moths, Mosquitoes. Direct spray in sweeping circular motion to thoroughly fill the room with mist. Keep windows and doors closed 10 to 15 minutes afterward. Wasps, Hornets: Double above dosage. Do not remain in treated areas. Ventilate the area after treatment is completed.

Out of Doors: For temporary protection against Mosquitoes, Flies, Gnats, spray area to be occupied. Direct mist along ground and other places sheltering insects.

Crawling Insects: Silverfish, Waterbugs, Fleas, Ants: Aim spray directly at insects where possible. Also spray into cracks and crevices—especially behind sinks, stove, cabinets, refrigerator and damp dark hiding places. Repeat as necessary. Fleas—Treat rugs, floors and animal quarters. Repeat as necessary. Ants—Spray trails. When finished, close room and leave for 15 minutes. Repeat as necessary. Bedbugs—Spray thoroughly the dismantled bed springs, mattress and frame giving special attention to all seams and cracks in the bed. Also spray cracks in floor, base boards and walls in room. Repeat as necessary.

CAUTION: CONTENTS UNDER PRESSURE. SEE OTHER PRECAUTIONS ON SIDE PANEL. KEEP OUT OF REACH OF CHILDREN.

NET WT. 12 OZ.
