DIRECTIONS FOR USE

17 It is a violation of federal law to use this product in a manner inconsistent with its labeling.
 When first filling pool or when no algae are visible use this product at a rate of 5.2 fluid oz. to each 10,000 gallons of pool water. If algae growth is visible apply the initial dose. Vacuum pool after 24 hours to remove

dead algae. If algae growth is still visible repeat dose as necessary until pool is free of visible algae. Therefore follow up with maintenance dose of 1.3 fluid oz per 10,000 gallons of pool water every 3-5 days

19 Therefore follow up with maintenance dose of 1.3 fluid oz per 10,000 gallons of pool water every 3-5 days or as needed to maintain 2 ppm active. Test kits are available for this use. For booster application add 1.3 fluid oz. per 10,000 gallons after a heavy or prolonged rainfall or when there is a heavy bathing load.

20 The above directions should be followed even when the pool is not in use. If algae growth is noticeable, apply the initial dose.

- ness or strength and requires no special equipment for treating swimming pool
 water. The correct use-dilution may be added directly to the pool in any spot, or
- added to the water circulation equipment.
 24 STORAGE: Store in original containers and place in locked storage area. Keep from freezing. Small spills may be mopped up or flushed away with water or absorbed on some absorbent material and incinerated.
