

"Pro" Algaecide

ACCEPTED

3432-31
APR 29 1981Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, this product is
registered under EPA Reg. No. 3432-31

EFFECTIVE AGAINST GREEN, BLACK & MUSTARD ALGAE

Active Ingredients:

Poly[oxyethylene(dimethyliminio)
ethylene(dimethyliminio)ethylene
dichloride]

Inert Ingredients:

30%
70%

EPA Reg. No. 3432-31

PA EST No. 3432-PA-1

CAUTION:

KEEP OUT OF REACH
OF CHILDREN

See back panel for further cautions

1 Quart

on-guard

DIRECTIONS FOR USE:

"PRO" ALGAECIDE is used to prevent and control the growth of algae, including so called "black algae", in swimming pools and spas. For maximum effectiveness, water containing heavy growth of algae should be cleaned prior to using "PRO" ALGAECIDE. For water having visible growth of algae, add an initial dose of 24 to 36 oz. of "PRO" ALGAECIDE per 10,000 gal. water and remove settled algae debris by cleaning (vacuuming). For treatment of freshly cleaned and filled pool or spa add initial dose 14 to 24 oz. of "PRO" ALGAECIDE per 10,000 gal. pool water. To maintain pools free of visible algae growth, subsequent additions of 4½ oz. "PRO" ALGAECIDE per 10,000 gal. (approx. 1 oz. per 2500 gal.) should be every 5-7 days after initial treatment. Uniform distribution (pour all around pool) of "PRO" ALGAECIDE throughout the water is necessary for maximum effectiveness.

"PRO" ALGAECIDE is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. "PRO" ALGAECIDE can be used in water treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix "PRO" ALGAECIDE with concentrated dry or liquid chlorine products.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

To Calculate Capacity of Pool

RECTANGULAR POOLS: Multiply length of pool x width of pool x average depth (all in feet) x 7.5 = gallons.

ROUND POOLS: Multiply diameter of pool x diameter of pool x average depth (all in feet) x 5.9 = gallons.
