Subject: POW Super Chlorinator  
EPA Registration No. 3432-37  
Application Date: Nov 18, 2009  
Receipt Date: Nov 20, 2009

Dear Ms. McCombie:

This acknowledges receipt of your notification, submitted under the provision of PR Notice 98-10, FIFRA section 3(c)9.

**Proposed Notification:**

- Revision of label with Minor label changes including container handling instructions per PR-Notice 2007-4

**General Comments:**

Based on a review of the material submitted, the following comment applies:

The notification application is acceptable and a copy has been inserted in your file for future reference.

Should you have any questions or comments concerning this letter, please contact me at (703) 308-6345.

Sincerely,

Wanda Y. Henson  
Acting Product Manager (32)  
Regulatory Management Branch II  
Antimicrobials Division (7510P)

**SUBJECT: N. Jonas & Company Inc.**  
**POW Super Chlorinator (EPA Reg. No. 3432-37)**  
**Notification of Minor Label Changes per PR Notices 1998-10, 2007-1, and 2007-4**  
**This Submission Is Not Subject To PRIA Fees**

Dear Ms. Mitchell:

As Agent for N. Jonas & Company Inc. ("Jonas"), I am submitting a Notification under the provisions of PR Notices 1998-10, 2007-1 and 2007-4 to advise the Agency of minor changes to the label for **POW Super Chlorinator (EPA Reg. No. 3432-37)**.

The label changes are as follows:

- 1) Replace the Environmental Hazards language, which was inadvertently omitted from the last label notification.
- 2) Update the container disposal language in the Storage and Disposal section per the instructions provided in PR Notice 2007-1 and PR Notice 2007-4. Please note that this Jonas product is sold for household/residential use only. Therefore, only the label language for household/residential containers required by these PR Notices is applicable to this product.
- 3) Move the First Aid statements to the front panel per the Agency's recent internal policy changing the current guidelines set forth in the Label Review Manual at Chapter 7, Part III, Section 7.3. Previously, the Agency did "permit reasonable variations in the placement of the First Aid statement as long as the reference statement, 'See First Aid (or Statement of Practical Treatment) on [identify appropriate panel]' appears on the front panel." However, since recent comments for EPA Reg. Nos. 3432-35, 3432-36 and 3432-56 have indicated that this former policy has changed, Jonas wants to ensure that all of their Toxicity Category I chlorinated products are in compliance with the new rule.
- 4) Revise the panel reference statement to read, "See [back] [side] panel for additional precautionary statements"

### FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

6/7

This product is meant to yield a quick increase in free chlorine residual for oxidizing organic matter and metals such as iron in swimming pools.

*(If container size is less than 5 gallons, use the following Environmental Hazards statement)*

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.

*(If container size is 5 gallons or larger, use the following Environmental Hazards statement)*

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of National Pollutant Discharge Elimination Systems (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER. CORROSIVE:** Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breath dust, vapor, or spray mist. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

**PHYSICAL AND CHEMICAL HAZARDS:** Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary. An easy, convenient and quick method for increasing chlorine residual in swimming pools. Contains completely soluble chlorine granules.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Use suitable test kit to determine exact chlorine residual. Each one ounce of this product will increase the chlorine residual approximately 2.5 ppm for approximately 2,000 gal. of pool water. Swimmers should not be in pool when super-chlorinating. Swimmers can return after chlorine residual has returned to below 2 ppm as measured by a good test kit. After super-chlorinating, add your regular swimming pool chlorine product according to package directions to maintain a minimum chlorine residual of 1.0 to 1.5 ppm at all times. If more than 2.5 ppm is desired then increase the amount of this product used, i.e. for 5 ppm, 2 oz. of this product/2000 gals.; 10 ppm, 4 oz. of this product/2,000 gals. pool water, etc. Be sure chlorine residual is below 3 ppm before swimmers are allowed in pool. Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.

**STORAGE AND DISPOSAL:** Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

**PESTICIDE STORAGE:** Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If Empty: Do not reuse this container. Place in trash or offer for recycling if available. If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**TO CALCULATE GALLONAGE:** For Rectangular Pool: Multiply length of pool by width of pool by average depth (all in feet) by 7.5 = gallons. For Round Pools: Multiply diameter of pool by diameter of pool by average depth (all in feet) by 5.9 = gallons.
