**DIRECTIONS FOR USE**

Algaecide Conc. is used to kill and control the growth of algae, including so-called 'black algae', in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using "Pro" algaecide. For pools having visible growth of algae, add an initial dose of 12-18 oz. of "Pro" algaecide per 10,000 gal. water (approx. 1 1/2 oz./1000 gal.) and remove settled algae debris by cleaning (vacuuming). For treatment of freshly cleaned and filled pool, add initial dose 7-12 oz. of "Pro" algaecide per 10,000 gal. pool water (approx. 1 oz./1000 gal. ) To maintain pools free of visible algae growth, subsequent additions of 2 1/4 oz. "Pro" 10,000 gal. (approx. 1 oz. per 5000 gal.) should be every 5-7 days after initial treatment. Uniform distribution (pour all around pool) of "Pro" algaecide concentrate throughout the pool water is necessary for maximum effectiveness.

"Pro"Algaecide Concentrate is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline ph. "Pro" Algaecide Conc. can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix "Pro" Algaecide Conc. with concentrated dry or liquid chlorine products.

**CAUTION: KEEP OUT OF REACH OF CHILDREN.**

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food. Rinse empty container thoroughly with water and discard container. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

**To Calculate Capacity of Pool**

Rectangular Pools: Multiply length of pool x width of pool x average depth (all in feet) x 7.5 = gallons.

Round Pools: Multiply diameter of pool x diameter of pool x average depth (all in feet) x 5.9 = gallons.
