DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is used to kill and control the growth of algae, including so called "black algae", in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using this product. For pools having visible growth of algae, add an initial dose of 12 to 18 oz. per 10,000 gal. water (approx. 1 1/2 to 1000 gal.) and remove settled algae debris by cleaning (vacuuming). For treatment of freshly cleaned and filled pool, add initial dose 7 to 12 ozs. per 10,000 gal. pool water. (approx. 1 oz. per 1000 gal.) To maintain pools free of visible algae growth, subsequent additions of 2 1/2 ozs. per 10,000 gal. (approx. 1 oz. per 5000 gal.) should be used every 5-7 days after initial treatment. Uniform distribution is necessary. Pour this product all around pool and throughout the pool water for maximum effectiveness.

This product is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. This product can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix this product with concentrated dry or liquid chlorine products.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

TO CALCULATE GALLONAGE FOR ROUND OR OVAL POOLS:
Multiply diameter x diameter x average depth (all in feet)
x 5.9 = gallons.

FOR RECTANGULAR POOLS:

Multiply length x width x average depth (all in feet) x 7.5 = gallons.
