DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT - SHAKE WELL BEFORE USING

ALGICIL-30S is used to prevent and control the growth of algae, including so called "black algae", in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGICIL-30S. For pools having visible growth of algae, add an initial dose of 16 to 24 oz. of ALGICIL-30S per 10,000 gal. water and remove settled algae debris by cleaning (vacuuming). For treatment of freshly cleaned and filled pool, add initial dose 8 to 12 oz. of ALGICIL-30S per 10,000 gal. pool water. To maintain pools free of visible algae growth, subsequent additions of 4 to 8 oz. ALGICIL-30S should be made every 5 to 7 days after initial treatment. Uniform distribution (pour all around pool) of ALGICIL-30S throughout the pool water is necessary for maximum effectiveness.

ALGICIL-30S is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGICIL-30S can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGICIL-30S with concentrated dry or liquid chlorine products.

NOTE: Do not backwash over lawns since ALGICIL-30S may kill grass.
