**SUBJECT: N. Jonas & Company Inc.
L-Clor (EPA Reg. No. 3432-57)
Notification of Minor Label Changes per PR Notices 1998-10, 2007-1, and 2007-4
This Submission Is Not Subject To PRIA Fees**

Dear Ms. Mitchell:

As Agent for N. Jonas & Company Inc. ("Jonas"), I am submitting a Notification under the provisions of PR Notices 1998-10, 2007-1 and 2007-4 to advise the Agency of minor changes to the label for **L-Clor (EPA Reg. No. 3432-57)**.

The label changes are as follows:

- 1) Replace the Environmental Hazards language, which was inadvertently omitted from the last label notification.
- 2) Update the container disposal language in the Storage and Disposal section per the instructions provided in PR Notice 2007-1 and PR Notice 2007-4. Please note that this Jonas product is for household/residential use only. Therefore, only the label language for household/residential containers required by these PR Notices is applicable to this product.
- 3) Move the First Aid statements to the front panel per the Agency's recent internal policy changing the current guidelines set forth in the Label Review Manual at Chapter 7, Part III, Section F(3). Previously, the Agency did "permit reasonable variations in the placement of the First Aid statement as long as the reference statement, 'See First Aid (or Statement of Practical Treatment) on [identify appropriate panel]' appears on the front panel." However, since recent comments for EPA Reg. Nos. 3432-35, 3432-36 and 3432-56 have indicated that this former policy has changed, Jonas wants to ensure that all of their Toxicity Category I chlorinated products are in compliance with the new rule.
- 4) Revise the panel reference statement to read, "See [back] [side] panel for additional precautionary statements"

4/7

Please find enclosed the following documents to support the notification for **L-Clor**:

- 1) Pesticide Application Form; and,
- 2) Three (3) copies of the revised product label with the changes highlighted.

Insofar as I am the authorized "Contact Point" and "Company Agent" for Jonas, please relay all correspondence directly to me at 122 C Street NW, Suite 740, Washington DC 20001. If you have any questions, please contact me by telephone at 202-393-3903 ext. 11 or by e-mail at wmccombie@lewisharrison.com.

Thank you very much for your cooperation.

Sincerely,

Wendy A. McCombie

L-CLOR

LITHIUM HYPOCHLORITE FOR SWIMMING POOL SANITATION AND ALGAE CONTROL COMPLETELY SOLUBLE

SPECIAL PRECAUTIONS (PLEASE READ)

1. This product has a powerful Chlorine odor. Hold away from face when opening package to avoid breathing fumes.
2. Prolonged contact between this product in it's undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint.
3. When adding this product to skimmer or feeder make sure that there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed per instructions on label. Do not take advice from others or experiment by yourself.

ACTIVE INGREDIENT:

Lithium Hypochlorite	29.0%
OTHER INGREDIENTS	71.0%
TOTAL	100.0%

Contains 35% available chlorine

NOTIFICATION
 Date Reviewed: *12/16/09*

KEEP OUT OF REACH OF CHILDREN DANGER

See back side panel for additional precautionary statements

FIRST AID
Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-303-595-9048 (collect) for emergency treatment information or 800-424-9300 (CHEMTREC) for transportation or spills information.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
IF IN EYES:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
NOTE TO PHYSICIAN: Lithium hypochlorite is corrosive to eyes, skin and mucous membranes with chemical burns (caustic). Treatment is dilution/flushing of site with copious amounts of water with controlled removal of exposure followed by symptomatic and supportive care to maintain life functions. Consideration should be given to careful endoscopy as stomach or esophageal burns, perforations or strictures may occur. Probable mucosal damage may contraindicate the use of gastric lavage. Careful gastric lavage with an endotracheal tube in place should be considered. Observation may be warranted.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. CORROSIVE: Causes irreversible eye damage or skin burns. May be fatal if swallowed. Harmful if inhaled. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield, protective clothing and rubber gloves when handling. Wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

(If container size is less than 5 gallons, use the following Environmental Hazards statement)

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

(If container size is 5 gallons or larger, use the following Environmental Hazards statement)

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of National Pollutant Discharge Elimination Systems (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

How to use this product: To start your pool: First backwash the filter, then utilizing a reliable test kit check the pH and adjust to 7.2-7.6. Add pH rise if pH is below 7.2. Add pH lower if pH is higher than 7.6. Maintain pH range (7.2-7.6). Use 2 cups of this product per 5,000 gal. of pool water. After the pH range (7.2-7.6) and chlorine residual (1.0-3.0 ppm) have been established it is beneficial to add Chlorine Stabilizer to the pool water. Follow the directions on the Chlorine Stabilizer package. Chlorine Stabilizer increases chlorine efficiency by helping to reduce chlorine loss due to the sun's ultraviolet rays.

HOW TO MAINTAIN THE PROPER CHLORINE RESIDUAL: The chlorine residual should be maintained between 1.0-3.0 ppm available chlorine as determined by a chlorine test kit. Under normal conditions and with 30-50 ppm Chlorine Stabilizer in the pool water, this residual can be maintained by the daily addition of about 1/3 cup (2.7 oz) of this product for each 5,000 gals. of pool water. Severe conditions, such as high temperature or continued use by many people, will require higher daily dosage, whereas smaller doses may suffice in Spring and Fall or when the pool is not subject to normal bathing loads. The pool water should be super-chlorinated about once each week. Five times the normal daily additions of a minimum of 1 cup (8 oz. per 5,000 gals. of pool water should be added in the evening when the pool will not be used for a minimum of 12 hrs. Test the chlorine residual and if above 3.0 ppm do not allow swimming until residual has decreased.

SPECIAL PRECAUTIONS (PLEASE READ):

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint.

- 3. When adding this product make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
- 4. Use this product as directed as per instructions on label. Do not take advice from others or experiment yourself.
- 5. Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.

STORAGE AND DISPOSAL: Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

PESTICIDE STORAGE: Keep product dry in a tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If Empty: Do not reuse this container. Place in trash or offer for recycling if available. If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
