Al Pastore Technical Director N. Jonas & Co., INC. 4520 Adams Circle Bensalem, PA 19020

Subject:

On Guard 3" Super Chlorinating Tablets

EPA Registration No. 3432-61

Application Date: November 24, 2003 Receipt Date: December 02, 2003

Dear Mr. Pastore:

This acknowledges receipt of your notification, submitted under the provision of PR Notice 98-10, FIFRA section 3(c)9.

Proposed Notification

addition of alternate brand name "Blue Water Pools Super 3" Chlorinating Tablets"

General Comments

Based on a review of the material submitted, the following comments apply:

The notification application is acceptable and a copy has been inserted in your file for future reference.

Should you have any questions or comments concerning this letter, please contact me at (703) 308-6345.

Sincerely,

Wanda Mitchell Product Manager 32 Regulatory Management Branch II Antimicrobials Division (7510C)

	Have the product container or label with you when calling a poleon control center or doctor, or going for treatment.
	NOTE TO PHYRICIAN
F	robable mucceal damage may contraindicate the use of gastric lavage.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXDIZING AGENT. Mix only with water. Use clean dry utensits. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moleture, organic matter or other chemicals may start a chemical reaction, with generation of heat, liberation of hezardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container, if possible isolate container in open air or well ventilated area. Flood with large volumes of water, if nec-

This product is meant to help keep becteria and algae under control in swimming pools.

This product is meant to help keep bacteria and algae under control in swimming pools.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Before using Chlorinating Tablets make sure there is sufficient chlorine residual (3.5-5.0 ppm) in the swimming pool by superchlorination, Next day add 1 lb. Chlorine Stabilizer (Booster) for each 4,000 gallons of water.

2. Place approximately 1 super tablet for 6,600 gallons of water per week either into a tablet dispenser and float it in the pool or directly into a akimmer basket if one is available, in no case should tablets be thrown directly into or on a vinyl liner as bleeching will result.

3. A good pool water test bit should be used at least once a day to check both pH and chlorine levels, pH should be between 7.2-7.5 and adjusted as necessary. Chlorine should be between 1-2 ppm. If chlorine level is too low, add more tablets until there is enough to maintain the 1-2 ppm.

This product can be used in any dispenser that uses Chlorine Concentrate tablets or sticks. Should not be mixed with any other kind of chlorine as an explosion could make the concentrate tablets or sticks. Should not be mixed with any other kind of chlorine as an explosion could make the concentrate tablets or sticks.

could moult.

NOTE: During heavy bathing loads, very hot weather, rain, etc. and at least once a week, chlorine residual should be raised to 3.5-5.0 ppm with granular chlorine (superchlorinated). It is preferable to do this after swimming day so that pool will have a chance to come back to the 1-2 ppm before swimmers go back in next

day.

Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine. Super tablets will last approximately 5-7 days depending upon temperature and amount of water flow. A 20 lb. pail will last a 10,000 gal. pool approximately 30 weeks; 30,000 gal. pool approximately 10 weeks. Each tablet weighs approximately 10 weeks.

and smoth of water ion. A 20 to part we want a 10,000 gat, prox approximately 7.3 cc.

STORAGE AND DISPOSAL: Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open fleme. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to classive all material before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate found or feed by storage, disposal, or cleaning of equipment.
