

ACCEPTED

DEC 14 2001

Under the Federal Insecticide, Fungicide, and Rodenticide Act, registered under EPA Reg. No. 3432-63

EFFECTIVE AGAINST GREEN, BLACK, MUSTARD ALGAE, AND ALGAL SLIME

- EXTREMELY LOW FOAMING
NON-METALLIC

ACTIVE INGREDIENT:

Didecyl dimethyl ammonium chloride 50%
OTHER INGREDIENTS: 50%
TOTAL 100%

EPA REG. NO. 3432-63

EPA REG. NO. 3432-PA-1

KEEP OUT OF REACH OF CHILDREN
DANGER

See Side panel for additional precautionary statements

FIRST AID

Table with 2 columns: Hazard (IF IN EYES, IF ON SKIN OR CLOTHING, IF SWALLOWED, IF INHALED) and First Aid instructions.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: This Algicide is cationic. Do not mix with soap or anionic materials. Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SWIMMING POOLS

INITIAL DOSE: Add 5 1/4 fluid ounces of product to 10,000 gallons of pool water.

MAINTENANCE DOSE: Add 1 1/4 fluid ounces of product to 10,000 gallons of pool water.

If pool has a visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added weekly. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

Maintenance dose should be added after a heavy or prolonged rainfall.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1/2 fluid ounce of product for each 1000 gallons of fresh make-up water added.

When swimming season is over, add maintenance dose prior to closing pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

When this product is used as directed, it is effective against Chlorella pyrenoidosa (green algae), Phormidium luridum (black algae), Lyngbya versicolor (blue-green algae), and Pleurochloris meiringensis (mustard algae), and other swimming pool algae and slime producing microorganisms.

For persistent algae or slime producing microorganisms growth, add 5-7 1/2 ounces of this product into the skimmer with the filter pump running. After one minute, shut off the pump and allow the system to remain off over night. The following day, restart the filter pump and add 5-7 1/2 ounces of this product to the pool. Run the filter continuously for 24-48 hours, brushing the sides and bottom of the pool frequently.

STORAGE: Keep container closed and in a cool place when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Mop up spills with clear water. Keep pesticides out of reach of children and stored away from food. PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash. CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.
