LITHIUM SPA SHOCK

Complete And Rapid
Solubility, Formulated
Specifically For Spas
And Hot Tubs

ACTIVE INGREDIENT: Lithium Hypochlorite 29%

OTHER INGREDIENTS 71%

Contains 35% available chlorine TOTAL 100%

EPA REG. NO. 3432-73 EPA EST. NO. 3432-PA-1

KEEP OUT OF REACH OF CHILDREN

DANGER

See Side Panel For Precautions and First Aid Statements

NET WT. 1 LB.

Mfg. by: N. Jonas & Co., Inc. • Bensalem, PA 19020

PRECAUTIONARY STATEMENTS

DANGER. Corrosive: Causes irreversible eye damage or skin burns. May be fatal if swallowed. Harmful if inhaled. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield, protective clothing and rubber gloves when handling. Wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

FIRST AID	
IF SWALLOWED	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED	<ul style="list-style-type: none"> Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
IF IN EYES	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor center for treatment advice.
HOT LINE NUMBER	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 303-595-9048 (collect) for emergency medical treatment information.	
NOTE TO PHYSICIAN	
Lithium hypochlorite is corrosive to eyes, skin and mucous membranes with chemical burns (caustic). Treatment is dilution/flushing of site with copious amounts of water with controlled removal of exposure followed by symptomatic and supportive care to maintain life functions. Consideration should be given to careful endoscopy as stomach or esophageal burns, perforations or strictures may occur. Probable mucosal damage may contraindicate the use of gastric lavage. Careful gastric lavage with an endotracheal tube in place should be considered. Observation may be warranted.	

PHYSICAL AND CHEMICAL HAZARDS: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SPA WATER CARE: Effective use of all spa sanitizers depends on maintaining proper water balance. The following ranges are high recommended:

• pH: 7.4 - 7.8 • Residual Available Chlorine 2.0-3.0 ppm • Total Alkalinity: 125-150 ppm
• Cyanuric Acid (Indoors) 0 ppm; (Outdoors) 30 ppm • Calcium Hardness: 200-300 ppm.

DIRECTIONS: SPA SHOCK is compatible with all spa sanitizers, but always add spa chemicals separately. Use a reliable test kit with fresh solutions for pH and chlorine testing. Add SPA SHOCK daily when the water appears dingy or hazy from bather contamination. Turn off the air blower and circulation system. Sprinkle SPA SHOCK into water at the rate of one ounce per 250 gallons. The granules will dissolve completely within seconds and liberate 10 ppm of available chlorine. Allow the ensuing reaction to proceed 10-15 minutes before covering the spa. Turn on the circulation system. Bathers should not re-enter the spa until the available chlorine residual falls to 3.0 ppm.

Before using the spa, shower in order to avoid adding soap, lotions, or oils from the body into the water. Do not add food or beverages to the water. Avoid overloading the spa.

SPA SHOCK should not be used more than once a day. If the spa is used daily, it should be drained and fresh-filled about once a month.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

STORAGE: Do not transfer into unlabeled containers. Close container tightly after each use. Store in a cool, dry well-ventilated area away from heat or open flame. Protect from moisture. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding.

DISPOSAL: Do not reuse container. Rinse container thoroughly before disposing. Place in trash collection or dispose in approved landfill areas.

ACCEPTED

JAN 10 2002

Under The Federal Insecticide, Fungicide and
Herbicide Act, as amended, for the
product registered under
EPA Reg. No. 3432-73
