PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. CORROSIVE: Causes irreversible eye damage. Wear protective eyewear (goggles, face shield, or safety glasses). May be fatal if inhaled. Do not breathe dust. Wear appropriate respirator. Do not get in eyes on skin or clothing. May be fatal if swallowed. Harmful if absorbed through skin. Prolonged or repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or the toilet. Remove and wash contaminated clothing before reuse.

(If container size is less than 50 pounds, use the following Environmental Hazards statement)

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

(If container size is 50 pounds or larger, use the following Environmental Hazards statement)

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of National Pollutant Discharge Elimination Systems (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

This product is meant to help keep bacteria and algae under control in swimming pools.

NOTE TO REVIEWER: The following section is for the 1" tablets:

[DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Before using this product make sure there is sufficient chlorine residual (3.5-5.0 ppm) in the swimming pool by superchlorination. Add Chlorine Stabilizer (Booster) to ensure a minimum of 30 to 40 ppm.
2. Place approximately 8 Multi Purpose small tablets for each 10,000 gallons of water per week directly into a skimmer basket. After approximately 24 hours test the chlorine residual, if it is less than 1.0 ppm add additional product to skimmer. Do not add any other chemicals to the skimmer while chlorine products are present as a violent reaction might occur.
3. A reliable water test kit should be used at least once a day to check both pH and chlorine levels. pH should be between 7.2-7.6 and adjusted as necessary. Chlorine should be between 1-4 ppm. If chlorine level is too low, add more tablets until there is enough to maintain the 1-4 ppm.
4. Reentry into the pool is prohibited if the chlorine level is above 4 ppm **due to risk of bodily harm.**

In no case should tablets be thrown directly into or on a vinyl liner as bleaching will result.

This product can be used in any dispenser that uses Chlorine Concentrate tablets or sticks. This product should not be mixed with any other kind of chlorine as an explosion could result.

NOTE: During heavy bathing loads, very hot weather, rain, etc. and at least once a week, the water should be super chlorinated with a granular chlorinating product. It is preferable to do this after swimming day so that pool will have a chance to come back to the 1-4 ppm before re-entering. These tablets will last approximately 5-7 days depending upon temperature and amount of water flow]
