HOW TO APPLY: Use a fertilizer spreader, avoiding types which would apply product in narrow concentrated bands. Apply evenly over the turf without skips or misses. A more uniform application can be made by spreading half the required amount of product over the area to be treated and then applying the remaining half at right angles or crosswise.

RESEEDING: Chemicals which effectively control annual weed seeds ray also affect new desirable turfgrass seedlings. Reseeding should be delayed for at least 6 weeks after application. When reseeding, it is necessary that proper moisture be maintained until grass seedlings are established. To assure satisfactory results after using this product, the amount of seed should be increased.

PRECAUTIONS: Do not apply in the spring to turfgrass planted the previous fall. Do not apply to bentgrass putting greens or Dichondra turf. Do not apply to newly sprigged areas of Bermudagrass, St. Augustinegrass, or Centipedegrass until these turfs are well established. If verticutting is done, do not apply for 2 to 3 weeks.

CAUTION

KEEP OUT OF REACH OF CHILDREN

harmful if swallowed is absorbed through the Skin. Avoid contact with skin eyes or clothing. In case of contact, flash with water. To not contaminate tend on tendstates. To but contaminate any body of water by direct application, that may not equip ent or disposal of water. To not let livestock graze thested areas to livestock.
