PENTA TEN-TO-ONE CONCENTRATE

Pentachlorophenol in concentrated strength for wood preserving. Can be diluted with 10 parts of fuel oil, diesel oil, paint thinner or kerosene for average use. Dilute with paint thinner if it is to be painted over. The heavier the application the better the penetration. A good preservative for posts, poles or lumber that is to come in contact with the ground or is exposed to the elements. Fence posts to be properly protected against wood rot, fungi, termites and powder post beetles should be peeled of bark, well seasoned, dry and dipped for 12 to 48 hours. Lumber to be in contact with the soil should receive at least 2 coats by brush or spray method or dipped for at least 3 minutes. Covering capacity approximately 150 to 200 square feet per gallon depending on porosity of wood and method in applying.

ACTIVE INGREDIENTS:

Pentachlorophenol	34.4%
Other Chlorinated Phenols	4.0%
Petroleum Distillates	37.0%
INERT INGREDIENTS	21.6%

USDA Reg. No. 3486-10

CAUTION: KEEP OUT OF REACH OF CHILDREN

May cause skin irritation. Do not get in eyes, on skin or clothing. Do not breathe vapor or spray mist. In case of contact with eyes, flush with water for at least 15 minutes. In case of contact with skin, wash immediately with soap and water. Use in well-ventilated places. Liquid or spray drift can kill or defoliate plants. Keep away from open flames and electrical equipment

Content 1 Gallon
