

FLIPO Special FLEA POWDER

ACTIVE INGREDIENTS
MALATHION (O,O-DIMETHYL
DITHIOPHOSPHATE OF DIETHYL
MERCAPTOSUCCINATE) 4.00%
INERT INGREDIENTS 96.00%

DIRECTIONS

For fleas and lice on dogs and cats: Brush hair back and apply powder down to skin. Spray powder on floor of kennel in cracks, crevices and other hiding places.

If the animal has free run, treatments may have to be made every second or third week. To avoid unnecessary applications, animal should be closely examined for fleas before re-treating. If the animal is confined to an area free of fleas, one treatment may be sufficient.

For control of fleas in kennels, pens, yards, lawns, and under houses, remove manure or debris and dust contents of this can on area up to 180 square feet.

For control of brown dog ticks, apply powder directly to tick, wherever possible.

CAUTION

Keep out of reach of children. Avoid breathing dust. Wash hands after applying. Avoid contamination of feed and foodstuffs.
