12-pt. bold type Important Statements: [illegible]

This cleaner may be used [illegible], and other surfaces that [illegible].

This cleaner is a [illegible] disinfectant [illegible]; it is also excellent for sanitizing [illegible] reducing the fungi count. When diluted [illegible], capable of killing the spores of T. interdigitale [illegible] athlete's foot as well as other infectious diseases on the floor. [illegible] efficient for preventing mildew and mold as well as getting rid of [illegible] odors due to decomposition of organic matter. May be used in either hard, soft, hot or cold water.

DIRECTIONS FOR USE

Solutions of this cleaner may be applied with a mop or sprayer. The loosened dirt and soil is best removed by rinsing with clear water, and then taken up with a mop or squeegee.

For non-resilient floors such as terrazzo, tile, marble, marbelette magnesite, flagstone, terra cotta, granolithic, travertene, etc.: mix one part of this cleaner with 20 to 40 parts of hot or warm water depending upon the amount of soil on the surface. If the floors are extremely soiled, use 1 part to 10 parts of water until the floor has an improved appearance. After that a more diluted solution may be used.
For resilient surfaces such as rubber, linoleum, asphalt tile, plastic, cork, as well as hardwood sealed or varnish floors; use 1 part of this cleaner to 30 parts of hot or warm water. For oil-soaked floors or for dance floor use 1 part of this cleaner to 10 parts of hot water. Allow to remain on the surface for several minutes before taking up with mop or squeegee.
