directions

UTIKEM WINTER-GRADE ALGAECIDE is a maintenance product specifically designed to prevent the growth of algae during swimming pool shut-down. Add at rate of 1 gallon for every 50,000 gallons of pool water, or 1 quart for every 12,500 gallons, before filter shut-down at end of swimming season and allow to circulate. (This treatment is usually sufficient for the normal off-season period. In some cases an additional one or two treatments may be necessary). Treatment should be repeated as above, but with no filter agitation, approximately four to six weeks before resuming daily pool operation.

Utikem

Winter-grade

algaeicide

ACTIVE INGREDIENTS: N-Alkyl (60% C14, 30% C16, 5% C18);
dimethyl benzyl ammonium chlorides 16.8%
N-di-alkyl (60% C14, 30% C16, 5% C12, 5% C18);
methyl benzyl ammonium chlorides 3.2%
INERT INGREDIENTS: 80.0%
100.0%

CAUTION: Keep out of reach of children.
Avoid contamination of food see side panel for other precautions

- Keeps Swimming Pool Water Clear
- Non-corrosive to Pool Lining
- Controls Algae Slime During Off-season Shut-down
- Helps Reduce Clean-up Time When Pool Is Put Into Operation

CAUTION — Harmful if swallowed from container. UTIKEM WINTER-GRADE ALGAECIDE is highly concentrated, it should be flushed from skin and eyes with water if accidentally splashed. If irritation persists, get medical attention. UTIKEM WINTER-GRADE ALGAECIDE is not a foodstuff and should not come in contact with food.
