Utikem[®] SUPER TAB STABILIZED Chlorine

Treats 8,000
gals.
7 weeks or
13,500 gals.
4 weeks

DESTROYS AND CONTROLS BACTERIA
AND ALGAE IN SWIMMING POOLS
COMPLETELY SOLUBLE
SANITIZER AND DISINFECTANT

Net Wt. 4 Lbs.
(1.81 kg)

EPA Reg. No. 3525-39
EPA EST 3525-NJ-1

WARNING
KEEP OUT OF REACH OF CHILDREN
(SEE SIDE PANEL FOR FURTHER WARNINGS)

WARNING
KEEP OUT OF REACH OF CHILDREN. MAY BE FATAL IF SWALLOWED. CAUSES SEVERE EYE IRRITATION. MAY CAUSE BURNS TO BROKEN SKIN. DO NOT BREATHE DUST IN CASE OF CONTACT WITH SKIN OR EYES. FLUSH WITH PLENTY OF WATER.
RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD. NEVER ADD TABLETS DIRECTLY TO POOL. USE A DISSOLVING BASKET OR OTHER SUITABLE DISPENSER.
STRONG OXIDIZING AGENT. AVOID CONTACT WITH HEAT, MOISTURE OR ORGANIC MATTER. KEEP CONTAINER CLOSED AND IN A COOL DRY PLACE WHEN NOT IN USE. MOISTURE CONTAMINATION MAY LIBERATE IRRITATING AND HAZARDOUS GASES.
IMPORTANT: NEVER MIX POOL CHEMICALS TOGETHER. ALWAYS ADD THEM TO THE POOL SEPARATELY.

FIRST AID
Internal: Feed bread soaked in milk followed by olive oil or cooking oil.
External: Immediately flush with plenty of water. Call a physician.

dosage as necessary to maintain cor-
sidual.

DIRECTIONS:

1. Test pool water pH to 7.4 to 7.8 as necessary with control chemicals.
2. Proper conditioning of pool water with CHLORINE STABILIZER is necessary to insure maximum effective use of Pool Chlorine Tablets. To the freshly filled pool add 1 lb. of CHLORINE STABILIZER for each 5,000 gallons of pool water capacity.
3. To a clean and algae free pool add one Chlorine Tablet for each 4,000 gallons of water to super chlorinate and satisfy the demand of the raw water. If there is no chlorine residual the following day or at least 1.0 to 1.5 ppm, recheck pH and repeat dosages to adjust pH and increase the chlorine content until satisfactory readings are obtained. Thereafter add one Chlorine Tablet daily for each 8,000 gallons of pool water capacity. This daily dosage should be adequate to maintain a chlorine residual of 1.0 to 1.5 ppm. During extremely hot weather or heavy bathing additional dosages may be required. Add Pool Chlorine Tablets through the dissolving basket or skimmer. They will dissolve quickly, leaving no residue, contain no scale forming minerals.

Test water at least daily for pH as well as chlorine residual as pH has a direct effect on chlorine action. Chlorine residual should be maintained at 1.0 to 1.5 ppm as determined by test kit. If chlorine residual should be lower, repeat dosage as necessary to maintain correct chlorine residual.
