The control of pH is greatly simplified using Utikem Super Concentrated Pool Chlorine. In fact, you will require stable concentrated Pool Chlorine provides a more stable to the tendent of acid usually applied. It is a more stable to the amount of acid usually provides at more stable to the tendent of an effective chlorine for easier maintenance of an effective less of the concentrate concentrate action. It regardless of Concentrate concentrate disinfecting action. It regardless form of chlorine water for disinfecting attength regardless concentrate concentrate and maintains constant that, after the later the storage space and maintains to use in that, concentrate concentrate attends apply Utikem Super Concentrate constant attends to apply Utikem Super Concentrate time. It is economical to specific time. It is economical time. It i

When starting up a new pool, superchlorinate to satisfy chlorine to 2.0 Utikem and to establish a chlorine residual of 1.00 gabilizer demand and to establish a accomplish this, add 1.000 gabilizer of the state of

tons to stabilize the pool.

Unikem Super Concentrate concentrated of 1000 at all times. The added daily or as needed at the rate of 1000 as a suitable test kit. The be added from the added daily or as determined by a suitable test kit. The gallons of pool water to determined by a suitable test kit. The gallons of 20 ppm as determined by 7.2 to 7.6.

Of 1.0 ppm to 2.0 ppm as between 7.2 to 7.6.

Of 1.0 ppm to 2.0 ppm as between 4.0 pm week during the should be made every week during ph should be made every a shock treatment should be made. pH should be maintained between 7.2 to 7.6.

Week treatments and between 7.2 to 7.6.

A shock treatment should be made every shock treatment, add treatment should be made every shock treatment, add the shock treatment and character. For the shock treatment character heavy rains. Less trequent shock treatment not be perweather made during cool weather. Swimmers should not chlorine may be made during concentrate concentrated not chlorine 2 oz. of Utikem Super Concentrate Swimmers until the 2 oz. of Utikem Super of water. Swimmers until the 2 oz. of Utikem Super the shock treatment range.

The permeasure of the shock treatment and in the permeasure of the 1.0 ppm to 2.0 ppm range. In the permeasure of the 1.0 ppm to 2.0 ppm range. The permeasure of the should be maintained in the mitted in the peached the 1.0 ppm to 2.0 ppm range.

The permeasure of the shock treatment and the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the chlorine should not be permeasured to the shock treatment and the shock treatme

residual has reached the 1.0 ppm to 2.0 ppm range.

UNDER THE PEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO.

- · Features a dry chlorine that dissolves immediately.
- . A most effective germicide and algaecide.
- · Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.
- · Will maintain your pool crystal clear.
- · Flame-resistant.

DANGER: KEEP OUT OF REACH OF CHILDREN COrrosive, Causes eye damage. Do not get in eyes or

on skin. Protect eyes and skin when handling product. Do not breathe dust. Dust may be harmful if inhaled. May cause skin, nose and throat irritation. May be fatal if swallowed. May cause burns to broken skin.

First Aid: In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contamined clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

DANGER

Strong o agent. Moisture contamination may liberate irritating agent. Irritating agent. Irritating agent. Irritating agent. Irritating agent. Irritating agent. Irritation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary. Mix only with water. Do not mix with other pool chemicals. Use only dry, clean measuring utensils. Store in a cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into takes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.
