

HEAD-STRONG is a concentrated acid disinfectant bathroom toilet bowl cleaner designed for institutional and hospital use. This disinfectant toilet bowl cleaner is especially formulated to kill many germs commonly found in hospital, industrial, and household environments. HEAD-STRONG is designed for use in toilet bowls and urinals.

HEAD-STRONG contains a high level of acid together with an acid compatible detergent system. This unusual combination facilitates the easy removal of resistant stains and permits its disinfectant action.

When used as directed, HEAD-STRONG cleans, disinfects and deodorizes in one easy step.

USE-DIRECTIONS

Flush toilet. Add 1 fluid oz. (2 tablespoons) directly to water in toilet bowl (¾ gallon). Brush to cover all interior surfaces of the bowl including under the rim. Allow disinfectant solution to remain at least 10 minutes. Flush toilet.

For badly stained bowls, repeat above treatment using 2 to 4 fluid ounces of HEAD-STRONG.

For use in urinals, add 1 fluid oz. (2 tablespoons) to ¾ gallon of water. Apply by brush to all urinal surfaces. Allow disinfectant solution to remain at least 10 minutes. Flush.

At 1 fluid oz./¾ gallon of water, HEAD-STRONG is effective against a broad spectrum of microorgan-

isms commonly found in toilet bowls and urinals. Effectiveness against Pseudomonas aeruginosa, Salmonella choleraesuis, Staphylococcus aureus, Shigella dysenteriae, Streptococcus faecalis and Escherichia coli has been confirmed by the AOAC Use-Dilution procedure.

Special Note

The cationic detergent system of HEAD-STRONG inhibits the acid corrosion of metal parts found around toilet bowls and urinals.

DANGER:

Corrosive. Keep Out of Reach of Children. May be fatal or harmful if swallowed. Do not breathe vapor or fumes. Produces chemical burns. Do not get in eyes, on skin, or on clothing.

FIRST AID

If swallowed, call a physician immediately. Drink a teaspoonful or more of milk of magnesia or a cup of soapy water followed with milk or raw egg whites.

Eye contact: Wash with water for 15 minutes. Get prompt medical attention.

Skin Contact: Wipe off the acid gently immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.

Rinse empty container with water before discarding it.
